ISSUES & ACTION ITEMS

#	TOPIC	ACTIONS/PROGRESS	STATUS	TARGET DATE
1.	4/11: GFI user Leo Beaulieu (on 5.7.0) is trying to access Order Status-> My Trades-> Other Filters. He receives "Error occurred while showing requested window" when he's trying to launch the window. It's been happening for 2 wks; this is the first time he's reported it.	Dev confirms seeing the error in his log. Error occurs upon setting value in combo box without that value being in the list of options. Dev tried, but no luck, to replicate issue by using Leo's version and preferences. Investigation continues.	NEW	
2.	4/11: BTIG user Dustin Lawlor reported he was disconnected mid-day.	FE log show many lost polls between 11:30 and 2 pm. This can cause disconnect if 5 consecutive polls fail. Since other users do not report such issues, I would attribute this to the connectivity on this user's side. Regarding the order handling disabled, it is unrelated to polling errors. This user received this message it same time user dlawlor from BNC01E received it. Will check server logs. Does this user connect via the internet?	NEW	
3.	4/11: Benchmark user Joe Kronk reported PrecISE disconnected 5 or 6 times today with the message order handling temporarily disabled.	Dev sees FE reporting order status enabled/disabled a few times. This is not a disconnect of the front-end, rather the FE received this BU session status (from either PORTS or Core Adapter). We will check the server logs.		
4.	Request to run POHR after 5:30PM		NEW	
5.	PrecISE icon testing for 5.7.3 / Geralyn's laptop	Status?	OPEN	
6.	Algo request: The ability for a user to submit a total quantity, slice size, time interval and NBBO pegged limit instructions. For both simple instruments and spreads (std, stk)?	Example: <ul style="list-style-type: none"> 5000 total to buy [ord qty] Buy in increments of 500 [e.g. min qty repeated] Every 15 minutes [new time interval field, 	NEW	

		editable on order level] <ul style="list-style-type: none"> Bid one valid tick better than the prevailing NBBO at the time interval mark

NEW / OUTSTANDING / OPEN ITEMS

#	DESCRIPTION	PRIORITY	STATUS/RESOLUTION/RESPONSE	OWNER
1.	4/8: Fabrice Beivas from TJM – logs show errors when he tried to reload his latest saved desktop. His previous profile settings from 4/4 were restored and user is OK.		Dev to confirm cause of error	Dev
2.	11/14 in Prod: Spread AMR reject from PHLX, AMEX, and ARCA. MPT did not have all the data. Rejects are due to the order of the FIX tags - 564 (LegPositionEffect) then 654 (LegRedID) In test, Citi's FIX tags were re-ordered differently than what they processed in Prod	On Hold	Possible solutions, since Cameron cannot re-order the FIX tags: <ul style="list-style-type: none"> Citi to re-order tags (Prod and test should be the same) Replace Cameron translator with a FIX engine for AMR 	Dev
