8	LOR 9.0 Incremental	Discuss current status and next steps	.. Expected live date 7/21 .. Currently in SQM test .. Any documentation change required? .. Day one set up?	Team	21-Jul
9	Add New LH	Discuss current status and next steps	.. Morgan will not be ready for Day one of R10.0 .. Should we still internally test this functionality in any form?	Team	
10	FIX certification - WEX/BAML	Planning exercise for external certification	.. Discuss timing (end of July-mid-August time frame) .. Contact person .. Set up details .. Documentation?	Team	
11	PIM Changes	Simple, Std, Stock combo PIM & Directed PIM to become Blind. Simple PIM and Directed PIM allowed to start through the IBBO	..schedule impacts	Team	28-Jul
12	272586	DNTT Opening: DNTTs will not trade at the opening in a specific case	... prod hot fix ... 9.000.070 installed in prod on 6/16 for 1 partition. ... to be installed in prod across all partitions 6/18. <b>Tom confirmed rollout. Closed.</b>	Team	
13	POB and curtailment - SIR 181238	Multiple prod instances of Ack delays after an order traded and caused curtailment. Today we finish all curtailments before disseminating POBs to both counter parties. There is an idea to send the POB to incoming order right away and continue with curtailment afterwards. This way the incoming order won't see any delay.	.. Kapil is looking to get performance changes relating to this issue. Eric to confirm time/effort required for the changes to help prioritization. .. <b>Under consideration: a performance enhancements only matcher R10.0 incremental with SIR 181238 and 226547 (Market Maker Prot Impr). Eric to assess impacts of 181238.</b>	Dev/PMG	
14	272346	Persistent Stock Combo IOC that is frozen during matcher crash and recovery is not cancelled during reload	... prod bug.. Legal OK to wait for the fix until R10.0 if we have a way to know it has occurred. Tom Pane confirmed MPT allows MOPs to query and cancel IOC orders. Tom Zi to confirm with MOPs if this can be added as an operational procedure until the fix is in place. .. Dan prefers the fix go in in the next release - team to target 9.0.200. In the event 9.0.200 is delayed beyond R10.0 timelines, this fix will go in with R10.0. Discuss team impacts/concerns if any. <b>Team OK with including it in R10.0. 9.0.200 has been shelved. Larry to confirm date for delivery.</b>	Team	R10.0
