### MEETING AGENDA

TIME	TOPIC	SPEAKER
15 min	New Production Issues	MOps / SQM / Dev
15 min	Outstanding issues / Open Items & Activities	Team
5 min	Release milestones	Team
5 min	Roadmap	Team
10 min	Roundtable	Team

### ISSUES & ACTION ITEMS

#	TOPIC	ACTIONS/PROGRESS	STATUS	TARGET DATE
1.	1/9: GFI on v5.6 tried to enter a delta neutral order below and his opt and stk give up fields grayed out  FYI This issue was also reported (and fixed) in 5.7 (SIR 250675, 247085).	We have identified one of 4 PrecISE web servers where the downloader config was pointing to 5.6.0.7. ASG fixed it and then we will need to ask user to close and reopen PrecISE. We are hoping the downloader will then update his local binaries to 5.6.0.13. However, on 1/13 the member said the new version did not load - The customer is still on the wrong version 5.6.0.7 according to the log.	NEW	
2.	1/21: User Mike McNally at GFI was prompted to reset his password. His attempts to reset were failing: invalid host. Ron reset the password for him and it worked. User is ok now.	The senario is: - Register 5.6.1 to download 5.6.0.13 version. - Expire user pwd. - Launch precise with this user who is using smart downloader. - Got below invalid host error. How does this test with 5.7 version?	NEW	
3.	PrecISE OHR updates for Done Away feature	Delivered to BAT. This can go to prod when the FE gets posted. 3 <sup>rd</sup> party orders not party of POHR since Day 1?	NEW	TBD
4.	TJM user reported on 1/6: he sent an order with a credit limit then cancel/replaced by putting negative sign '-' in the front of the price in the price field, then sent the order. Because of the '-' sign before the price, the price field got even out.	User was educated that there's no need to put a negative sign to denote a credit – the credit button will take care of that.	CLOSED	
5.	CHS display (showing up as '8') resolved with proper configs in prod		CLOSED	

## NEW / OUTSTANDING / OPEN ITEMS

#	DESCRIPTION	PRIORITY	STATUS/RESOLUTION/RESPONSE	OWNER
1.	SNC email notifications broken	High	ASG to put job in check_mk. <b>In progress</b>	ASG
2.	11/14 in Prod: Spread AMR reject from PHLX, AMEX, and ARCA. MPT did not have all the data. Rejects are due to the order of the FIX tags - 564 (LegPositionEffect) then 654 (LegRedID) In test, Citi's FIX tags were re-ordered differently than what they processed in Prod	On Hold	Possible solutions, since Cameron cannot re-order the FIX tags: <ul style="list-style-type: none"> <li>Citi to re-order tags (Prod and test should be the same)</li> <li>Replace Cameron translator with a FIX engine for AMR</li> </ul>	Dev

## CORE RELEASE 8.0 / PRECISE RELEASE 5.7

**Target date: January 13, 2014 for BE, January 16, 2014 for FE**

**Status: In BAT**

#	SIR #	DESCRIPTION	REQMTS	FD
