4		Topics For V	Veekly Meeting		
5					
6 7		Ma	atcher		
	PIM Changes	,	schedule impacts		
		Simple, Std, Stock combo PIM & Directed PIM to become Blind.	Currently in test.		
8		Simple PIM and Directed PIM allowed to start through the IBBO	R10.0 testing currently on target. SQM to raise a flag in case they see concerns.	Team	28-Ju
	272586		prod hot fix		
			9.000.070 installed in prod on 6/16 for 1 partition to be installed in prod across all partitions 6/18.		
9		DNTT Opening: DNTTs will not trade at the opening in a specific case	Tom confirmed rollout. Closed.	Team	
	POB and	Multiple prod instances of Ack delays after an order traded and caused	Kapil is looking to get performance changes relating to this issue. Eric	Dev/PMG	
	curtailment - SIR 181238	curtailment. Today we finish all curtailments before disseminating POBs to both counter parties. There is an idea to send the POB to incoming order right away	to confirm time/effort required for the changes to help prioritization Under consideration: a performance enhancements only matcher		
		and continue with curtailment afterwards. This way the incoming order won't	R10.0 incremental with SIR 181238 and 226547 (Market Maker Prot		
10		see any delay.	Impr). Eric to assess impacts of 181238.		
10	272346	Persistent Stock Combo IOC that is frozen during matcher crash and recovery is	prod bug Legal OK to wait for the fix until R10.0 if we have a way to	Team	R10.0
		not cancelled during reload	know it has occurred. Tom Pane confirmed MPT allows MOPs to query		
			and cancel IOC orders. Tom Zi to confirm with MOPs if this can be added as an operational procedure until the fix is in place.		
			Dan prefers the fix go in in the next release - team to target 9.0.200.		
			In the event 9.0.200 is delayed beyond R10.0 timelines, this fix will go		
			in with R10.0. Discuss team impacts/concerns if any. Team OK with including it in R10.0. 9.0.200 has been shelved.		
			Rich to provide estimates once Adam is back.
