NEW / OUTSTANDING / OPEN ITEMS

#	DESCRIPTION	PRIORITY	STATUS/RESOLUTION/RESPONSE	OWNER
1.	SIR 252870. ISEAPP Log File Naming Convention. This was moved out of Post 9.0 Inc 2 due to an issue and can go separately in either a post R10 release or in the R10 release with minimal scope that has the least amount of risk (ASG and Dev to determine this scope).		This issue can be solved in two ways: 1. IORS can start using latest BSI code in which watchdog is disabled. 2. IORS can use latest watchdog and enterprise logging code in which this issue is resolved.	Dev
2.	SIR 231406. IORS to support GTSApi's Connection Gateway login functionality. Implemented in Post 9.0 Incr 1 but off for Day 1.		Live date is TBD based on a core change	Dev
